# FRAME WORK

Quick and simple parametric product library construction and cutlisting software

Innovative software developed by Eurosoft, Inc. that provides the Framework for you to create your very own fully parametric product library. Create your parametric library, complete with CNC instructions and user definable product parameters. With your complete product catalog at your fingertips, quickly put together a job and cutlist to send to your machines for manufacturing.

Your finished order will come complete with reports as well as links to import data from your datasource (e.g. ERP or spreadsheet) and output to your optimizer and CAM software.

The Benefits of Framework:
Simple Cutlisting Software

1 No need for CAD/CAM or other design software

2 No need to mainatin a large library of designs

3 Parametric templates handle a wide array of product options

4 Speed: Product templates replace the typical arduous design process

5 Simplicity: Go from template to machine in just a few clicks
